Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1745

1. Applicant's election of Group I in Paper No. 9 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. The amendment filed 11-26-2002 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the insert on page 36 comprises the new matter. Such insertion should have been filed with the original application papers.

Applicant is required to cancel the new matter in the reply to this Office Action.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 25-31 and 33-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Fukuda et al.-US 6,001,505 ('505)

Reference is made to Figures 1-3 of '505 along with column 4, lines 4-40 and column 7, line 18 through column 9, line 67. The '505 patent discloses the dual insulating layer around each of the external terminals of the non-aqueous battery.

5. Claims 25-28 and 35-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Fukuda et al.-US 6,004,693 ('693)

Art Unit: 1745

See column 2, lines 54-68, column 4, lines 54-63 of '693 and column 7, lines 33-45 along with all of the drawing figures therein. The '693 patent sets forth the insulating layer around each of the battery terminals.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 25, 29, 31 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over '505.

The '505 patent teaches all of the claimed subject matter except for the acid denatured polyolefin. To form the exterior layer of the insulating layers in '505 of a denatured polyolefin would have been obvious to one of ordinary skill in this art at the time the invention was made because the same would improve the adhesion properties of the said polyolefin. This is especially important in the '505 patent to seal the battery so no electrolyte would leak out.
